

New Hampshire Aviation Historical Society

Darrell A. Wagner
150 Robinson Road
Hudson, NH 03051

March 15, 2004

Dear Darrell:

Warmest greetings to you and members of the Southern New Hampshire Radio Control Club. Please express my appreciation for the opportunity to speak with the group presenting the life of Ruth Law and the current activities of New Hampshire Aviation Historical Society. I was especially glad to report the recent gift of Henry Hafke's Gee Bee models, artwork and manuscripts with those who have a special interest in the beauty and history of aeromodels. We have also been given several dozen radio control videos and rare aviation films which are available for use by members.

Please accept this invitation to become active members in the Society as we proceed in the second century of powered flight to collect, preserve and inspire with New Hampshire's Aviation and Aerospace history, including yours! I look forward to the day that your models fly at MHT.

If any of your members would like me to speak to civic and social organizations they belong to, please do not hesitate to contact me. Wishing you all the *wings* of good health and fortune, I remain

Cordially,

Barbara D. Miles
